

**ADVERTISEMENT FOR ENGINEERING AND RELATED SERVICES  
NOVEMBER 8, 2023**

**CONTRACT NO. 4400027805  
IDIQ CONTRACT FOR STATEWIDE AVIATION PROGRAM UPDATE  
STATEWIDE**

**NO DBE GOAL**

Under the authority granted by Title 48 of Louisiana Revised Statutes, the Louisiana Department of Transportation and Development (DOTD) hereby issues this advertisement for consulting firms to provide engineering and related services. **Consultants who are a Louisiana or foreign LLC or corporation should be appropriately registered with the Louisiana Secretary of State, as contemplated by Title 12 of the Louisiana Revised Statutes, and with the Louisiana Professional Engineering and Land Surveying (LAPELS) Board under its rules for firms. If a consultant is not in good standing in accordance with those provisions, it may be subject to consequences contemplated in Title 12 and/or the LAPELS rules. All requirements of LAPELS must be met at the time the proposal is submitted. Prime consultants must be registered with the Louisiana Secretary of State and the Federal Government, using SAM.gov, prior to contract execution.**

One (1) proposal will be selected for the contract solicited per this advertisement. Only one (1) DOTD Form 24-102 proposal is required for this advertisement, and it represents the prime consultant's qualifications and those of any and all sub-consultants proposed to be used for the referenced contract(s). All identifying contract number(s) should be listed in Section 2 of the DOTD Form 24-102. **USE THE DOTD FORM 24-102, DATED JANUARY 1, 2023, PROVIDED WITH THE ADVERTISEMENT.**

Any questions concerning this advertisement must be sent in writing to [DOTDConsultantAds80@la.gov](mailto:DOTDConsultantAds80@la.gov) no less than 48 hours (excluding weekends and holidays) prior to the proposal deadline.

**SCOPE OF SERVICES**

The general tasks that the consultant may be required to perform are described more specifically in Attachment A, which is incorporated herein by reference. The selected consultant will perform the specific services covered in an Indefinite Delivery/Indefinite Quantity (IDIQ) contract as detailed in individual Task Orders (TOs), which will specify TO-specific scope of services, contract time, and compensation.

The consultant shall perform the work in accordance with the requirements of this advertisement, the resulting contract, and any TOs issued thereunder. Deliverables shall be in such format as required in Attachment A, unless otherwise specified in an individual TO. The work performed by the consultant shall be performed in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances.

**MINIMUM PERSONNEL REQUIREMENTS (MPRs)**

The requirements set forth in Attachment B must be met at the time the proposal is submitted.

**EVALUATION CRITERIA**

The criteria to be used by DOTD in evaluating responses for the selection of a consultant to perform these services are listed below:

1. firm experience on similar projects, weighting factor of three (3);
2. staff experience on similar projects, weighting factor of four (4);
3. firm size as related to the project magnitude, weighting factor of three (3);
4. past performance on similar DOTD projects, weighting factor of six (6)\*;
5. current work load with DOTD, weighting factor of five (5);
6. approach and methodology, weighting factor of nine (9).

\*The consultant is to identify in the table below those evaluation disciplines consistent with the approach and methodology proposed in Section 18 of the DOTD Form 24-102.

**THE FOLLOWING TABLE MUST BE COMPLETED AND INCLUDED IN SECTION 12 OF THE DOTD FORM 24-102 PROPOSAL.**

<p><b>Sub-consultants are allowed to be used for this proposal.</b> Fill in the table by identifying only those evaluation disciplines consistent with the approach and methodology proposed in Section 18 of the DOTD Form 24-102*, the name of each firm that is part of the proposal, and the percentage of work in each past performance evaluation discipline to be performed by that firm. The percentage estimated for each evaluation discipline is for evaluation purposes only and will not control the actual performance or payment of the work. The percentages for the prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percent of the contract. (Add rows and columns as needed)</p>							
Past Performance Evaluation Discipline(s)	% of Overall Contract	Prime	Firm B	Firm C	Firm D	Firm E	Each Discipline must total to 100%
							100%
							100%
							100%
Identify the percentage of work for the <b>overall contract</b> to be performed by the prime consultant and each sub-consultant.							
Percent of Contract	100%						-----

\*The past performance evaluation disciplines are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and/or Other (please specify).

## **CONTRACT NO. 4400027805**

If sub-consultants are used, the prime consultant must perform greater than 50% of the work for the overall contract.

Proposals will be evaluated as set forth in the "Evaluation Criteria" section of this advertisement. The evaluation will be by means of a point-based rating system. Each of the above criteria will receive a rating on a scale of one (1) through five (5). The rating will then be multiplied by the corresponding weighting factor. The rating in each category will then be added to arrive at the proposal's final rating.

DOTD's Project Evaluation Team (PET) will be responsible for performing the above described evaluation, and will present a shortlist of the three (3) (if three are qualified), highest rated consultants to the Secretary of DOTD. The Secretary will make the final selection.

### **COMPLIANCE WITH SUPPLEMENTAL ETHICS REQUIREMENTS**

DOTD has established supplemental ethics requirements applicable to consultants and PET members. These requirements are found in the "Supplemental Ethics Requirements" article of the sample contract linked to this advertisement, which are incorporated herein by reference. Any firm that is found to have violated these requirements may not be considered for this selection.

**By submission of a proposal to perform services pursuant to this advertisement, the consultant agrees to comply with DOTD's Supplemental Ethics Requirements.**

### **RULES OF CONTACT UPON ADVERTISEMENT**

DOTD is the single source of information regarding the contract selection. Any official correspondence will be in writing, and any official information regarding the contract will be disseminated by DOTD's designated representative via the DOTD website. The following rules of contact will apply during the contract selection process, commencing on the advertisement posting date and ceasing at the time of final contract selection. Contact includes face-to-face communication, the use of a telephone, facsimile, electronic mail (email), or formal or informal written communications with DOTD. Any contact determined to be improper, at the sole discretion of DOTD, may result in the rejection of the proposal (i.e., DOTD Form 24-102).

Consultants and consultant organizations shall correspond with DOTD regarding this advertisement only through the email address designated herein; [DOTDConsultantAds80@la.gov](mailto:DOTDConsultantAds80@la.gov) and during DOTD sponsored one-on-one meetings.

No consultant, or any other party on behalf of a consultant, shall contact any DOTD employee, other than as specified herein. This prohibition includes, but is not limited to, the contacting of: department, office, or section heads, project managers, members of the evaluation teams, and any official who may participate in the decision to award the contract resulting from this advertisement.

DOTD will not be responsible for any information or exchange that occurs outside the official process specified above.

## **CONTRACT NO. 4400027805**

**By submission of a proposal to perform services pursuant to this advertisement, the consultant agrees to the communication protocol herein.**

### **CONTRACT TIME**

This IDIQ contract shall be in effect for **five (5) years**. **All TOs must be completed by the termination date of the IDIQ contract.** No TO will be initiated unless sufficient contract time remains to complete the TO.

### **COMPENSATION**

The maximum compensation payable to the consultant under the IDIQ contract shall not exceed **\$335,000**. Compensation to the consultant for services rendered in connection with each TO may be made on the basis of lump sum, actual cost plus a fixed fee, cost per unit of work, or specific rates of compensation, as specified in each TO, subject to the limitation set forth in the IDIQ contract.

Compensation may be either negotiated or non-negotiated as determined by DOTD for each individual TO. When the compensation is negotiated, it will be determined by DOTD based on work hours negotiated between DOTD and the consultant. After notification of selection, a kick-off meeting will be held with the selected consultant and appropriate DOTD personnel. The selected consultant will be required to submit a work hour proposal. All negotiations must be completed within the timeframe set forth in the Consultant Contract Services Manual, unless an abbreviated timeframe is specified in writing by the PM.

### **DIRECT EXPENSES**

To the extent that the consultant is allowed to claim reimbursement for direct expenses, all direct expense items that are not paid for in the firm's indirect cost rate, and are needed, and will be consumed during the life of the contract must be identified by the consultant during contract development. The acquisition or rental of standard equipment or resources to be used in the provision of services rendered for this contract will not be considered for payment under direct expenses (e.g., vehicles for construction engineering and inspection (CE&I) inspectors).

The consultant should own most of the equipment required to provide the work and services. The cost of this equipment should be included in the consultant's indirect cost rate. Equipment may be considered "specialized" if it cannot be considered standard equipment for that particular consultant's normal operating business needs. If a consultant believes special equipment is needed for the contract, the consultant must inquire through the Question and Answer process, as provided herein, whether the identified item will be considered specialized equipment for the individual contract.

To the extent that direct expenses are authorized to be compensated pursuant to a particular TO, all travel related expenses will be compensated under direct expenses, and will be in accordance with the most current Louisiana Office of State Travel regulations as promulgated in the Louisiana Administrative Code under the caption "PPM No. 49", with the exception that compensation for

vehicle usage will be based on actual miles traveled directly and exclusively related to project needs. Vehicle rental rates will require prior approval from the PM.

### **CYBERSECURITY TRAINING**

In accordance with La. R.S. 42:1267(B)(3) and the State of Louisiana’s Information Security Policy, if the Consultant, any of its employees, agents, or sub-consultants will have access to State government information technology assets, the Consultant’s employees, agents, or sub-consultants with such access must complete cybersecurity training annually, and the Consultant must present evidence of such compliance annually and upon request. The Consultant may use the cybersecurity training course offered by the Louisiana Department of State Civil Service without additional cost or may use any alternate course approved in writing by the Office of Technology Services.

For purposes of this Section, “access to State government information technology assets,” means the possession of credentials, equipment, or authorization to access the internal workings of State information technology systems or networks. Examples would include but not be limited to State-issued laptops, VPN credentials to credentials to access the State network, badging to access the State’s telecommunications closets or systems, or permissions to maintain or modify IT systems used by the State. Final determination of scope inclusions or exclusions relative to access to State government information technology assets will be made by the Office of Technology Services.

### **QUALITY ASSURANCE/QUALITY CONTROL**

DOTD requires the selected consultant and all sub-consultants to develop a Quality Assurance/Quality Control (QA/QC) program in order to provide a mechanism by which all deliverables will be subject to a systematic and consistent review. The selected consultant shall address in its plan the review of all sub-consultant work and deliverables. **Only the selected consultant must submit their QA/QC plan to the DOTD PM within 10 business days of the award notification to the consultant (do not include QA/QC plan in the DOTD Form 24-102).** Consultants must ensure quality and adhere to established DOTD policies, procedures, standards and guidelines in the preparation and review of all deliverables. DOTD may provide limited input and technical assistance to the consultant. Any deliverables to be transmitted by the consultant shall be transmitted with a DOTD Quality Assurance/Quality Control Checklist, and a certification that the deliverables meet DOTD’s quality standards.

If Attachment A includes specific QA/QC requirements that contradict those set forth above, the requirements in Attachment A control.

### **TRAFFIC ENGINEERING PROCESS AND REPORT TRAINING REQUIREMENTS**

As part of DOTD’s on-going commitment to high quality traffic engineering reports, a traffic engineering training course must be taken by traffic engineering PEs and EIs in order to be eligible to work on DOTD projects. When traffic is included as a discipline on which past performance is evaluated, for consultants performing traffic engineering services (i.e., traffic analysis throughout all DOTD project stages and/or QC of traffic analysis), appropriate personnel must successfully complete the three (3) modules of the Traffic Engineering Process and Report Course offered by

Louisiana Transportation Research Center (LTRC). This Course must be completed no later than the time the proposal is submitted or show proof of registration for the Course from the LTRC's Registration site. **Copies of training certificates or proof of registration are to be included in Section 20 of the proposal.** It will be the prime consultant's responsibility to ensure their staff and sub-consultants complete the training. Copies of training records may be obtained from the LTRC website <https://registration.ltrc.lsu.edu/login>.

### **WORK ZONE TRAINING REQUIREMENTS**

As part of DOTD's on-going commitment to work zone safety, required work zone training courses must now be taken every four (4) years in order for personnel to remain eligible to work on DOTD projects. For consultants performing preconstruction services (*e.g.*, design, survey, subsurface utility, geotechnical, traffic, bridge inspection, environmental services), appropriate personnel must successfully complete these courses. In general, the person in responsible charge of traffic control plans shall be required to have Traffic Control Supervisor training. For preconstruction field services performed within the clear zone, at least one (1) member of the field crew shall have Traffic Control Supervisor or Traffic Control Technician training. The consultant should identify all personnel listed in the staffing plan (Section 14) for the contract who have completed the appropriate work zone training courses. All preconstruction work zone training requirements shall be met **prior to contract execution**. It will be the prime consultant's responsibility to ensure their staff and sub-consultants have the appropriate work zone training.

In addition to the above requirements, if the Scope of Services set forth in Attachment A includes Construction Engineering and Inspection (CE&I), the following training requirements shall be met **at the time the proposal is submitted**:

Field Engineers:	Traffic Control Technician Traffic Control Supervisor Flagger
Field Engineer Interns:	Traffic Control Technician Traffic Control Supervisor Flagger
Field Senior Technicians, Survey Party Chiefs, and SUE Worksite Traffic Supervisors*:	Traffic Control Technician Traffic Control Supervisor Flagger
Other Field Personnel*:	Traffic Control Technician Flagger

\* excluding Asphalt Plant Inspector, Paint Managers, and Paint Inspectors

Approved courses are offered by ATSSA and AGC. Substitutes for these courses must be approved by the DOTD Work Zone Task Force. For more information, please contact DOTD HQ Construction at 225-379-1584. Specific training course requirements are:

Flagger: Successful completion every four (4) years of a work zone flagger course approved by the Department. The “DOTD Maintenance Basic Flagging Procedures Workshop” is not an acceptable substitute for the ATSSA and AGC flagging courses.

Traffic Control Technician (TCT): Successful completion every four (4) years of a work zone traffic control technician course approved by the Department. After initial successful completion, it is not necessary to retake this course every four (4) years if Traffic Control Supervisor training is completed every four (4) years.

Traffic Control Supervisor (TCS): Successful completion of a work zone traffic control supervisor course approved by the Department. Following an initial completion, traffic control supervisors must either complete a one (1)-day TCS refresher course or retake the original two (2)-day TCS course every four (4) years.

ATSSA contact information: (877) 642-4637

### CONTRACT EXECUTION REQUIREMENTS

The selected consultant will be required to execute the contract within ten (10) days after receipt of the contract.

A sample of the contract provisions can be found at the following link: [http://wwwsp.dotd.la.gov/Inside\\_LaDOTD/Divisions/Engineering/CCS/Pages/Advertisements.aspx](http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/CCS/Pages/Advertisements.aspx).

### SECONDARY SELECTION PROCESS

When multiple IDIQ contracts with similar scopes of service are available within a DOTD Section that is prepared to issue a TO, the TO selection procedures set forth in Attachment C shall be used to award that TO. Documentation of the selection process shall be retained by DOTD.

### REVISIONS TO THE ADVERTISEMENT

DOTD reserves the right to revise any part of the advertisement by issuing addenda to the advertisement at any time. Issuance of this advertisement in no way constitutes a commitment by DOTD to award a contract. DOTD reserves the right to accept or reject, in whole or part, all DOTD Form 24-102s submitted, and/or cancel this consultant services procurement if it is determined to be in DOTD’s best interest. All materials submitted in response to this advertisement become the property of DOTD, and selection or rejection of a proposal does not

## CONTRACT NO. 4400027805

affect this right. DOTD also reserves the right, at its sole discretion, to waive administrative informalities contained in the advertisement.

### CLARIFICATIONS

DOTD reserves the right to request clarification of ambiguities or apparent inconsistencies found within any proposal, if it is determined to be in DOTD's best interest.

### PROPOSAL REQUIREMENTS

The consultant's proposal for this advertisement must be submitted by email to [DOTDConsultantAds80@la.gov](mailto:DOTDConsultantAds80@la.gov). **USE THE DOTD FORM 24-102, DATED JANUARY 1, 2023, PROVIDED WITH THE ADVERTISEMENT.** Hard copies of the consultant's proposal are not required. All proposals must be in accordance with the requirements of this advertisement, and the Consultant Contract Services Manual. Unless otherwise stated in this advertisement, copies of licenses and certificates are not required to be submitted with the proposal.

If more than one (1) contract is to be selected based on this advertisement, no prime consultant is allowed to be a sub-consultant on any other consultant's 24-102. If a prime consultant is submitted as a sub-consultant on another consultant's 24-102, its proposal as a prime consultant may be deemed non-responsive.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

DOTD employees may not submit a proposal, nor be included as part of a consultant's proposal.

Contract and/or part-time employees are allowed. Such employees should be shown in Section 14 of the DOTD Form 24-102 with an asterisk denoting their employment status.

The DOTD Form 24-102 **PDF file shall be labeled** "CONTRACT NO. 4400027805, Consultant's name", and **must be received no later than 3:00 p.m. Central Time by** [DOTDConsultantAds80@la.gov](mailto:DOTDConsultantAds80@la.gov) **via email on Wednesday, December 6, 2023.** **The PDF file must be attached in the email or as a hyperlink in the email or as an email through third-party file transfer websites such as Dropbox or WeTransfer.**

**Please note that delivery failure may occur on email files exceeding 30MB uncompressed. In addition, all emails are scanned for cybersecurity threats prior to delivery to** [DOTDConsultantAds80@la.gov](mailto:DOTDConsultantAds80@la.gov); **therefore, allow sufficient time** for this process to take place when submitting your proposal.

**ATTACHMENT A – SCOPE OF SERVICES**

The project time is typical.

**PROJECT DESCRIPTION**

The Consultant will provide engineering, technical, environmental, and planning services related to the statewide aviation system and individual airports. The Consultant may also be expected to provide and have expertise in airport master planning and airport systems sustainability best practices. The Consultant shall demonstrate a strong background in all facets of statewide aviation system planning, forecasting, economic impact, and operations in order to support the Louisiana Aviation System efforts and related projects. These elements will include work at general aviation airports in the Louisiana Airport System as identified in the Louisiana Airport System Plan. The work will be conducted within Federal Aviation Administration Advisory Circulars, FAA Orders, FAA Engineering Briefs, and state standards.

**SCOPE OF SERVICES**

Airports are an essential component of the Louisiana Transportation System. Protecting, preserving, and developing the valuable infrastructure and economic opportunities at these airports through progressive development management is very important, and that is the focus of this statewide aviation system project. This program is a development endeavor that we will commence in accordance with state and FAA guidelines. The contract will contain airport planning projects, technical analyses, aviation research, and program development during that time frame to update and advance an innovative aviation system program for the state of Louisiana.

The scope of this project entails the completion of elements by a Consultant to assist and work closely with DOTD to develop statewide programs and parameter and focus on implementation and oversight of the program with respect to the Louisiana Aviation System. The overall development of the program data will be used in the Department's information system platforms, Aviation Information System (AIS), Elevate, and future airport development plans

The following is a summary of the major tasks required and associated with this project that will be required of the Consultant. A complete detailed Scope of Services will be negotiated with the Consultant and become part of the final contract with DOTD. The following set of items will be conducted in multiple task orders during the IDIQ contract time-frame.

**ELEMENT I. Update Airport Layout Plan and Provide Feasibility Study**

This element will consist of updating the airport layout plans for Unclassified NPIAS airports and Non-NPIAS state only funded airports as necessary. This scope of services identifies requisite elements necessary to update the existing Airport Layout Plan (ALP) Drawing Set and Narrative Report on file for selected airports in the Louisiana Airport System. Further, the Consultant will be required to demonstrate a strong background in all facets of statewide aviation system planning and operations in order to support the Louisiana Airport System efforts and related projects. The Consultant shall have expertise in Geographic Information Systems (GIS) pertaining to airports including the FAA's Airport GIS Program, and electronic Airport Layout Plans (ALP). The Consultant shall have the expertise to conduct ALP reviews as needed by Louisiana Department of Transportation and Development (DOTD). By completing this Scope of Work, the documents required for DOTD review and conditional approval of future airport development plans will be created. This element will also include coordination with the airport owner and stakeholders involved in the development of the deliverable. This element order will consist of updating the airport layout plans for Unclassified NPIAS airports and Non-NPIAS state only funded airports as necessary. This scope of services identifies requisite elements necessary to update the existing Airport Layout Plan (ALP) Drawing Set and Narrative Report on file for various Louisiana airports. By completing this Scope of Work, the documents required for DOTD review and conditional approval of future airport development plans will be created. This element will also include coordination with the airport owner and stakeholders involved in the development of the deliverable.

Pertinent data from the FAA, DOTD, and other available sources will be collected and compiled. This will include both data relative to the airport and the surrounding community (such as land use plans and zoning regulations/ordinances). Socio-economic projections, past trends, and existing FAA and DOTD forecasts will be reviewed and analyzed. This update will follow guidelines contained in FAA Advisory Circular (AC) 150/5070-6B, *Airport Master Plans, Chapter 10 "Airport Layout Plan" and Appendix F "ALP Drawing Set"* and will identify improvements necessary to accommodate aviation activity 20 years into the future. An ALP Drawing Set and Narrative Report will be the final products of this study.

The site location adjacent to the Industrial Business Park is not included in the feasibility study. The Consultant will make assumptions for cost estimating construction at a new site location to accommodate existing and future aviation demand, provide for improved/upgraded aviation facilities, and future runway extensions. All assumptions for cost estimating purposes will comply with current FAA design guidelines and safety standards. No travel is included with this Element.

Further, the Consultant shall provide all necessary planning, engineering and related technical services required to develop and complete a feasibility report for the Bunkie Municipal Airport. This study is to determine the feasibility of relocating the airport to be adjacent to the Bunkie Industrial Park to accommodate existing and future aviation demand, provide for improved/upgraded aviation facilities, construction of a runway consisting of at least a 5,000 feet with at least one instrument approach procedure, comply with current FAA design guidelines and safety standards. The cost of construction for a new airport will be compared to the cost of improving the existing airport to accommodate similar growth and satisfy FAA guidelines.

**ELEMENT II. Obstruction Removal Assessment Plan.**

This element will review a specified number of General Aviation airports and the respective runways and associated approach corridors as identified by DOTD. To ensure safety of operations in the airspace in the immediate vicinity of airports that the Federal Aviation Administration has established as a set of obstacle limitation surfaces that defines standards for determining whether an object is a hazard to air navigation. These surfaces protect approaches and departures to runways, takeoffs, and missed approaches. Objects that penetrate these surfaces are considered obstructions to air navigation and many times are recommended to be removed. The element will determine the technical approach slopes and subsequent acreage and area for the runway ends including but not limited to visual approaches, non-precision instrument approaches, precision approaches, precision approach path indicator approach slopes, obstacle clearance surface, light signal clearance surface and departure surfaces for general aviation airports in the system. Additionally, the consulting engineer will conduct airspace survey in accordance with Federal Aviation Advisory Circular (AC) 150/5300-16A, 17C, and 18B (or most recent equivalents), conduct property title searches for location of penetrations, ascertain airport/public and municipality owned property versus private owned property, acquire estimated appraisal value of parcels that are identified for land acquisition or easements and recommend a priority for mitigation techniques. Further, the element will recommend a best practices approach and develop a statewide mitigation plan to include various funding scenarios for both short-term and long-term funding opportunities. The Consultant will work closely with DOTD to develop the statewide program parameters and requirements.

**ELEMENT III. Airport Certification and Infrastructure Study**

The Consultant shall provide technical and engineering analysis pertaining to the processes, infrastructure, airport rescue and firefighting, airport staffing, airport emergency response, and any other requirements as set forth in Title 14, Code of Federal Regulations (CFR), Part 139, Federal Aviation Administration (FAA) Order 5190.6B as it pertains to the engineering, infrastructure design, economic nondiscrimination, fee and rental structure, and airport revenue requirements for airports identified or that may participate in FAR Part 139 certification.

The Consultant shall provide the associated technical and design infrastructure needs and associated development costs as necessary. The Consultant shall provide a technical report to the Department on the selected general aviation airports covering the assessment of the processes, existing infrastructure, airport rescue and firefighting capabilities, staffing requirements, infrastructures needs, costs associated with completing the infrastructure, additional personnel costs, and a benefit cost analysis of participation in the FAR Part 139 program over the next 20 years. The Consultant shall provide a legal template for general aviation airports in the Louisiana Aviation System Plan covering the same development process of the specified airports. The Consultant shall develop and provide to the Department a legal template for aeronautical and non-aeronautical lease requirements, rental agreements, and aircraft storage requirements in accordance with FAA grant assurances.

**ELEMENT IV. Transition to FAA Block Grant Program**

The purpose of this element is to assist DOTD with any efforts that may be necessary to transition to the FAA Block Grant Program. It will be important for the Consultant to have experience in airport engineering and design, project cost estimating, planning programs, airport layout plans, airport compliance, financial forecasting and projection with states and specific individuals that participate in the FAA Block Grant Program. Specific elements may include identifying staffing needs, creation of policy documents, coordination with all levels of the FAA, and other specific assignments to be determined by DOTD. It is the general goal that through many of the IDIQ elements it will set the stage for the potential transition of DOTD to the FAA's Block Grant Program. It will be important for the Consultant to tailor all elements and documentation in such a way that DOTD would be able to make such a transition possible at some time in the future.

**ELEMENT V. Airport Safety Program**

The Consultant will conduct regional training workshops on airport self-inspections techniques, basic airport maintenance performance including reactive preventative and predictive maintenance practices as well as scalable methodologies for financing a maintenance program. This element order will provide a basic airport site assessment of selected general aviation airports as identified in the Louisiana Airport System Plan. A collection of best practices and a general evaluation of the types of performance measures and mitigation techniques may be developed and reported. The Consultant will have expertise in developing training materials, conducting training, developing statewide technical informational bulletins, statewide technical aviation communication announcements, newsletters, development and coordination of the state aeronautical chart and emergency chart supplement for emergency events, airport directory updates, as needed, to support the DOTD aviation office, including training and expertise related to airport operations and management, inspection, licensing criteria, emergency management, airport airspace and land use regulations, aviation and airport security, and pavement inspection. The consulting engineer will have or have a subcontract with personnel who have at least 10 years of airside airport safety and compliance inspection experience.

**SERVICES TO BE PERFORMED / ITEMS TO BE PROVIDED BY DOTD**

The following services and/or data will be provided, if available:

1. Airport Historical Project information including as-builts, design plans, etc.
2. Airport Information including airport layout plans, airport contacts, aerial photography etc.

**ELECTRONIC DELIVERABLES**

Consultant hereby agrees to produce electronic deliverables in conformance with DOTD Software and Deliverable Standards for Electronic Plans document in effect as of the effective date of the most recent contract action or modification, unless exempted in writing by the Project Manager. Consultant is also responsible for ensuring that sub-consultants submit their electronic deliverables in conformance with the same standards. DOTD Software and Deliverable Standards for

## **CONTRACT NO. 4400027805**

Electronic Plans document and DOTD CAD Standards Downloads are available via links on the DOTD web site.

Consultant shall apply patches to CAD Standard Resources and install incremental updates of software as needed or required. Consultant hereby agrees to install major updates to software versions and CAD Standard Resources in a timely manner. Major updates of CAD standards and software versions shall be applied per directive or approval of the DOTD Design Automation Manager. Such updates will not have a significant impact on the plan development time or project delivery date, nor will they require Consultant to purchase additional software. Prior to proceeding with plan development, Consultant shall contact the Project Manager for any special instructions regarding project-specific requirements.

In the event that any Digital Plan Delivery Standard conflicts with written documentation, including DOTD plan-development Manuals, the Digital Plan Delivery Standard governs. Consultant is responsible for contacting the Project Manager should questions arise.

Consultant shall upload (or check in) electronic deliverables directly into the DOTD ProjectWise repository at each plan delivery milestone. Consultants are responsible for performing certain operations at each milestone including, but not limited to, the following:

- Upload (or check in) CAD plan deliverables to the discipline “Plans” folder
- Apply and maintain indexing attributes to CAD plans (and other deliverables as needed)
- Publish PDF format plan submittals in ProjectWise using automated publishing tools
- Digitally sign PDF format plan submittals in ProjectWise according to DOTD standards and procedures (Final Plans, Revisions and Change Orders). Signatures shall be applied in signature blocks provided with electronic seals and Title Sheets.

Additionally, after reviewing deliverables for each submittal milestone, the Project Manager shall notify Consultant regarding the availability of two automatically-generated informational reports in ProjectWise. These reports document the completion status and other information regarding indexing attributes and CAD standards. Consultants shall take these reports into account and make any necessary adjustments to plans before the next submittal milestone; or sooner, if directed by the Project Manager.

**ATTACHMENT B – MINIMUM PERSONNEL REQUIREMENTS (MPRs)**

The following requirements must be met at the time the proposal is submitted:

1. At least one (1) principal of the prime consultant shall be a registered professional engineer in the state of Louisiana.
2. At least one (1) principal or other responsible member of the prime consultant shall be currently registered in the state of Louisiana as a professional engineer in civil engineering.
3. At least one (1) principal or responsible member of the prime consultant shall have a minimum of five (10) years of experience in responsible charge of in airport engineering, consulting, and airport design and planning.

**MPRS ARE TO BE MET BY SEPARATE INDIVIDUALS,  
UNLESS STATED OTHERWISE BELOW.**

**MPR Nos. 1 through 3 may be met by the same person.**

**NOTE: WHEN SATISFYING A MINIMUM PERSONNEL REQUIREMENT, PLEASE ENSURE THE RÉSUMÉ REFLECTS REQUIRED EXPERIENCE AS REQUESTED.**

- Please note the number of MPRs are minimal; however, all relevant personnel necessary to perform the Scope of Services must be identified in Section 14 of the DOTD Form 24-102 and their resumes included in Section 16 of the DOTD Form 24-102.

**ATTACHMENT C – SECONDARY SELECTIONS FOR TASK ORDERS**

**Procedures for selecting among IDIQ contracts for issuance of Task Orders**

If proposed new TO is to be issued for the purpose of extending services related to services performed under a previously issued TO by a particular consultant with whom DOTD has an existing IDIQ contract containing the appropriate scope of services and with time and funding capacity available sufficient to support the issuance of the new TO under said contract, then that consultant's contract will be tasked.

Otherwise, when more than one IDIQ is available for the provision of the services required, the following procedure will be employed to determine which of the IDIQ contracts will be tasked.

1. Identify all IDIQ contracts that apply – type/scope of work in contract
  - a. If applies, move to next step
  - b. If does not apply, then cannot use the contract
2. Determine if there is sufficient time remaining on the contract to complete the work
  - a. If yes, proceed to next step
  - b. If no, then cannot use the contract
3. Determine if there is sufficient compensation remaining on contract to complete the work
  - a. If yes, proceed to next step
  - b. If no, cannot use the contract
4. Determine if specialty tasks are required or if timing of performance is critical
  - a. If yes, can the consultant perform the work, as needed? (Consideration may be given to experience with task(s), current workload, and past performance.)
    - i. If yes, the consultant can perform the work, then proceed to next step
    - ii. If no, the consultant should not or is not able to perform the work, do not use the contract. Document the reasons, *e.g.*, the consultant is less experienced, past performance indicates that the consultant may have difficulty with task(s), the consultant has multiple jobs ongoing for DOTD so timeliness may be an issue, etc.
  - b. If no specialty tasks or timeliness issues are present, then proceed to the next step.
5. If more than one IDIQ contract reaches this step, then they will be distinguished from one another by the consultants': 1) familiarity or experience with the services required; 2) locality, where a local presence will add value to the quality and efficiency of the project; or 3) the amount of remaining contract time or remaining available compensation.
  - a. Select the contract whose consultant is most familiar or experienced with the services required.

**CONTRACT NO. 4400027805**

- b. If the consultants are equal regarding familiarity/unfamiliarity with the services required, then select the contract whose consultant is local to the project area, provided that a local presence will add value to the quality and efficiency of the project.
- c. If the consultants are equal on the criteria of familiarity and experience with the services required and locality, if applicable, then select the contract with the most available time or the most available compensation on the contract, with due consideration given to the risks involved and the needs of the project.
