QUESTION AND ANSWERS

- Q. The maps of the project limits mentioned for these proposed works are not readily found with the advertisements. Are they available?
- A. Although the advertisement states that maps of the project limit is included, this information was not included due to the size of the document. Instead, each advertisement gave the road and creek associated with each structure along with the structure number in the Project Description and an address of the proximity under the Evaluation Criteria. Vicinity Maps for each project are available upon request.
