FEDERAL AID PROJECT NO. H.011309

MACARTHUR INTERCHANGE COMPLETION PH. II

ROUTE US 90-Z

JEFFERSON PARISH

QUESTIONS AND ANSWERS

Q1.) Under Item 3 of the Minimum Personnel Requirements, can the requirement for ten year experienced Professional Civil Engineers for the design of “steel or concrete trapezoidal, box, “tub”, or U-girders” be satisfied by a Sub-Consultant rather than being under the Prime Consultant?

A1.) DOTD Bridge Design is of the opinion that the personnel requirements should remain as spelled out in the advertisement. A very significant portion of this project involves the design of complex bridge elements and the Prime Consultant will need to be involved directly in key decisions which can only be made by experienced individuals.

Q2.) Will DOTD provide the estimated project cost (fee) which will be utilized on this project for the evaluation of item 3, firm size?

A2.) We will not provide a cost estimate on a negotiated lump sum contract.
