

State Project No. 700-30-0320
F.A.P. NO. DE-3010(503)
Widening US 84 from Highway 772 to East of Hair Creek Bridge
Route US 84
LaSalle Parish

Q. What is the role of the Professional for the standing structures on this project?
The bridge crossings are small bridges.

A. The reference to standing structures is for the Cultural Resources report that will be necessary. There will have to be determinations made as to which (if any) structures along the route are eligible for listing on the National Register. While the bridges themselves might not be listed, there are likely several buildings in the downtown area that will likely be of historical importance.
