RETAINER CONTRACT NOS. 4400006934 and 4400006935

RETAINER CONTRACTS FOR RIGHT OF WAY ACQUISITION AND RELATED SERVICES FOR PROJECTS STATEWIDE

QUESTIONS AND ANSWERS

Q1 Within the posted Scope of Services, Page 6 of 6, Par. VII (Improvement Control Services), bullet point 4, duties are to include “ensure asbestos inspection and assessment report is prepared, where required”. Will LADOTD require the chosen consultant or subcontractor to prepare any needed asbestos inspection and assessment reports under this retainer contract, or will the LADOTD contract that function separately and provide those reports to the chosen consultant?

A1 The selected consultant will not be required to perform an asbestos inspection or prepare an assessment report under the contract numbers listed above. The selected consultant will be required to identify structures needing asbestos inspections and report that information to the Right of Way Project Manager. The selected consultant may need to coordinate with the asbestos inspector assigned to the project in order for the inspector to gain access to the structure.
